

Four Oaks & District Darts League

Corona virus (Covid-19) Advisory

Covid-19 Mitigation

- 1) Players are encouraged to wear masks when not playing, and may optionally wear them when playing.
- 2) Players must retrieve their own darts unless limited by a physical handicap.
- 3) Physical contact between players is limited to Elbow bumps.
- 4) All team members should observe social distancing whilst the match is being played.
- 5) Any player who suspects he may be infected must do the following.
 - a) Get tested for Covid-19 as soon as possible,
 - b) If the results are positive report the results to either the Captain or Secretary.
 - c) Self-isolate or seek medical assistance as appropriate.
- 6) Markers and checkers are encouraged to wear masks. Teams by agreement can play without a designated checker.

Test & Trace

- 7) Captains and Secretaries are to inform the League Secretary of any player from their team who has tested positive for Covid-19.
- 8) Captains and Secretaries when completing the match draw must do the following.
 - a) Those players present but not selected to play should be listed along the top of the result sheet for the team. (Top left above the Four Oaks & District heading.) That is the home team will list their additional players on their sheet and the away team their additional players on their result sheet.
 - b) Team Supporters who are in attendance and not registered to play should be listed on the remarks line.

Note: A change to the Four Oaks & District Software which stores player details is to include an optional Telephone number field to facilitate contact for forthcoming seasons.

In the interim the League Secretary will be the focus for test and trace activity. To coordinate contact between Teams should any individual become infected.

The above were voted on and accepted at a Delegates meeting on the 20/9/2020.

Following the Delegates meeting on 12th of September 2021 the above Covid-19 recommendations became advisory for those players with compromised immune systems or underlying health problems which put them at serious risk if infected with Covid-19.
